## **Introduction**

Two S&GRP samples were received at the WSCF Laboratory on May 20, 2009. Samples were analyzed for the analytes indicated on the attached copy of the chain of custody (COC) form in accordance with the *Statement of Work (SOW), Modification No. 2 to Agreement 36587, Release 3, "FH WSCF ANALYTICAL SERVICES FOR GROUNDWATER."*

The narrative (Attachment 2) will address sample characteristics, analyses requested and general information in performance of the analytical methods. A Data Summary Report (Attachment 3) includes analytical results, a comment report detailing method abnormalities, tentatively identified peaks if applicable, method references, and Laboratory QC information as applicable. Copies of the chain of custody and sample receipt documentation are included as Attachment 4.

The following generic data qualifiers (i.e., B, D, and J) may be applicable to this report, as appropriate

- **B** – Sample results with a concentration greater than the MDL but less than the PQL are B flagged (applies to inorganic and wetchem analyses), as appropriate.
- **D** – Sample results are D flagged if dilution(s) were required, as appropriate.
- **J** – Sample results with a concentration greater than the MDL but less than the PQL are J flagged (applies to organic analyses), as appropriate.

## **Analytical Methodology for Requested Analyses**

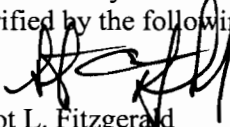

Refer to *WSCF Method References Report*, page 10, for a complete listing of approved analytical methods.

## **Organic Comments**

**VOC (Vapor)** – A Blank, Laboratory Control Sample (LCS), LCS Duplicate (LCSD) and Limit of Quantitation Standard (LOQ) were analyzed with this delivery group. See pages 15 through 22 for QC details. Analytical Note(s):

- 1-butanol exceeded calibration requirement with a recovery of 27%, and hexanenitrile exceeded the calibration requirement with a recovery of 29%.
- LCS – 1,1 –dichloroethylene recovery was 65%, carbon disulfide recovery was 62.0%, methylene chloride recovery was 62%, and furan recovery was at 67%. All recoveries were below the established limit of 70%.
- LCSD – carbon disulfide recovery was 67%, carbon tetrachloride recovery was 67.0%, methylene chloride recovery was 67%, and furan recovery was 67%. All recoveries were below the established limit of 70%.
- LQO –Butanal recovery was 49%, 3-hexanone recovery was 45.0%, MIBK recovery was 49%. All recoveries were below the established limit of 50%.
- All other QC controls are within the established limits.

We certify that this data package is in compliance with the SOW, both technically and for completeness, for other than the conditions detailed above. Release of the data contained in this data package has been authorized by the Analytical Laboratory Manager (or designee) and the Client Services representative as verified by the following signatures.
